## INSTANT PROTECTION INSTANT RESPONSE

The integral PIR sensor detects movement the infra-red illuminators switch on and the camera records a 10 second video of what caused the alarm. This video is then sent to our control room where the operators verify the alarm and dispatch the security guard. The video can also be sent to your mobile phone or an email address.

### Cameras Mounted Anywhere

**Portable Remote Sentries** The portable battery powered camera sensors (PIR motion sensor with integrated camera and illuminators) can be installed anywhere; often mounted on portable stands that can be picked up and moved around as the situation demands - no trenching, no wires. The integrated PIR motion sensor detects intruders in all weather conditions, ignoring rain or snow.

## VIDEO SECURITY UNPLUGGED

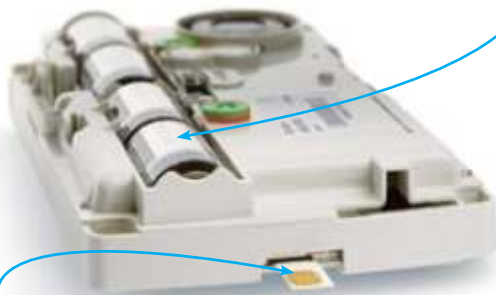

## APPREHENSIONS

The Instant Witness System means fast response to catch intruders - in contrast to DVRs used to identify an intruder after an incident occurs.

- No AC Power
- 2 year Battery Life
- Weatherproof (-20F to +140F)
- Totally Wireless Operation
- Instant Installation
- Video Alarm sent over Mobile Phone Network to Monitoring Station
- Eliminate Alarm Fines

**Self Powered**  
(up to 2 year battery life)

Control Panel

### Integrated GPRS cell Modular Communicator

### Instant Witness System

Outdoor Camera

Optional Outdoor Siren
